gene nomenclature
filarial nematodes 416ff
gene switching
trypanosomes 212ff
gene vectors 99ff
generalized linear modelling 33ff
genetic engineering
transgenic insect technology 99ff
genetic immunization 328ff
genetic variability
intraspecific 196ff
genome analysis
Schistosoma 45ff
Trypanosoma cruzi 16ff
genome organization
Trypanosoma brucei 5(fig.)
genomic profiling 198ff
geographical information systems
lymphatic filariasis 472ff
malaria risk mapping 313ff
Schistosoma mansoni distribution 112ff
Giardia
chromosomes 249
infection 3ff
glucose-6-phosphate dehydrogenase 11ff
guanylyl cyclase 31
guinea worm
global eradication 431ff
gut infections, immune effector mechanisms 366

H

haemoglobin
peptide source 351ff
haemoglobinopathy
malaria hypothesis 207
Haemonchus contortus
cysteine proteinase activity 119ff
Haplorchis spp (L) 40
heartwater
epidemiology (L) 243
heat-shock protein
microsporidia 455
Toxoplasma gondii infection 465ff
helminth infections
chemotherapy *see* anthelmintic chemotherapy
and enteric nervous system 63ff
helminths 407ff
aquatic hosts 333
control 410ff, 411ff
neuromuscular systems 163ff
hepatitis B
surface antigen particles 302ff
heteroduplex analysis 271ff
hexose monophosphate shunt *see* pentose phosphate pathway
historical studies 417
Stoll, Norman Rudolph 409
Ross centenary 290ff, (L) 489
vector biology 295ff, (L) 489
host cell invasion 1
humoral immunity 477ff
hydrogenosomes
trichomonad 166
hypoglycaemia
and malaria (L) 275
hypoxanthine
phosphoribosyltransferase 238ff

I

Ichthyophthirius multifiliis
host resistance 477ff
ICT filariasis test 401ff
IgG subclasses 145ff
immobilization antigens 477
immune effector mechanisms 365ff
immune recognition
insects 223ff
immune response
cell-mediated 184ff
toxoplasmosis 246
immunization
genetic 328ff
immunity
cell-mediated 335ff
cross-species 229ff
evolution of (L) 39
heat-shock protein 465ff

morbidity (L) 123
mortality (L) 123, (L) 318

natural selection on polymorphic antigens 26ff
parasite–mosquito specificity 297ff
parasite reproductive restraint 135ff
pentose phosphate pathway 12
pigment 327
quinine resistance 89ff
risk mapping in Africa 313ff
Ross centenary 290ff, (L) 489
sickle-cell gene 107ff
signal transduction in parasites 307ff
smear diagnosis 334
transmission 90ff, 295ff
rates (L) 318
α-thalassaemic children 207ff
and tumour necrosis factor (L) 275
vaccine development 26ff, 46ff, 171ff, 279ff, 286ff, 302ff
vector biology 326
vector control 90ff
mate choice
and parasite infection 332ff
matrix metalloproteinases 383ff
membrane phospholipid asymmetry
in *Plasmodium falciparum*-infected erythrocytes (L) 242
merozoite
surface antigen-2 145ff
surface proteins 26
MHC genes 48
microsporidia
biological nature 455ff
mimicry (L) 39
mosquitoes
control 458
internet discussion 9, 169, 210, 250
malaria–mosquito specificity 297ff
microbial control 485ff
nets *see* bednets
Ross centenary 290ff, (L) 489
multi-gene vaccination
malaria 171ff
multi-immune response 171ff
Mycobacterium
intracellular environment 203
Mycoplasma
contamination of *Plasmodium* cultures 367ff

N

nematodes 407ff
human muscle (L) 488
internet discussions 132, 333, 417
intestinal 438ff
nervous systems 163ff
satellite DNA sequences as taxonomic markers 398ff
soil-transmitted 43ff
surface phenomena 52ff
Neospora, bovine (L) 40
Neospora caninum (L) 40
neuroimmunoendocrinology
helminth infections 63ff
nitric oxide pathway 31
NK-lysin 179
not-self recognition 223ff

O

onchocerciasis
chemotherapy 423
chorioretinal disease 94ff
control 418ff, 425ff
epidemiology 422
heteroduplex analysis 271ff
opioids
pain sensitivity 332ff
Orientia tsutsugamushi
drug resistance 131ff

P

pain sensitivity 332ff
paragonimiasis 87
parasite differentiation
cdc2-related kinases 7ff, (L) 38
parasite genetic variability 196ff
parasite neuropeptides 67
parasite parasitism 367ff
parasite persistence mechanisms 1ff
parasite proteases
extracorporeal function 119ff
parasitoids
Drosophila cellular immunity 218ff
parasitology
environmental 251ff
parasitophorous duct
Plasmodium 357ff
parateny (L) 201
pathogen–vector relationship
malaria 295ff
pentose phosphate pathway 11ff
Pgh I
expression and drug resistance 208ff
phospholipid asymmetry
in *Plasmodium falciparum*-infected erythrocytes (L) 242
pinworms 333
Plasmodium 2
cdc2-related kinases 7ff, (L) 38
cell cycle (L) 241, 307ff
Mycoplasma contamination of cultures 367ff
multistage multi-immune approach 171ff
pentose phosphate pathway 11ff
Plasmodium falciparum
asexual stage antigens 145ff
atypical IgG subclass antibody responses 145ff
cell cycle control (L) 241
chondroitin sulphate as adherence receptor 70ff
combination chemotherapy for malaria 167ff
HLA class I-associated resistance 48ff
infection chronicity 353ff
interactions with *P. vivax* 227ff
membrane phospholipid asymmetry in infected erythrocytes (L) 242
parasitophorous duct 357ff
polymorphisms in antigen genes 26
population genetics 376ff
